Technical Skills

Programming Languages: C | C++ | JavaScript | Java | Python | SQL
Frameworks & Technologies: FastAPI | Spring Boot | LangGraph | REST APIs | JWT | Swagger (OpenAPI) | React.js, React Native | HTML5 | CSS3
Databases: PostgreSQL | MySQL | Redis | Firebase
Tools: Git | GitHub | Jenkins | Docker | Postman | VS Code | Liquibase | PyTest
CS Fundamentals: Data Structure and Algorithms | OOP | Operating Systems | DBMS | Computer Networks

Work Experience

Associate Software Engineer *Aug 2025 – Present*
WiseTech Global

- Engineered an **AI-assisted build pre-validation and CI/CD automation workflow** using **Python**, **LiteLLM (Gemini models)**, and **Jenkins**, enabling local build validation, automated dependency updates, branch creation, build verification, and pull request generation, reducing debugging effort by **70%** and release preparation time by **80–90%**.
- Built **12+ RESTful APIs** using **Python** and **FastAPI** for an AI-powered digital assistant platform, integrating **LangGraph**-based agent workflows to process user inputs and generate context-aware responses, enabling real-time conversational handling across concurrent user sessions.
- Implemented secure **session management** using **JWT authentication** and **Redis**-based conversation memory, enabling stateful API interactions and improving response efficiency across repeated conversational requests.
- Implemented **configuration versioning** (v1, v2, v3. . .) using **Spring Boot**, enabling immutable configuration history, controlled updates, and safe rollback of AI prompt settings across evolving system versions.
- Managed database schema evolution using **Liquibase**, implementing **15+ migration scripts** and enforcing referential integrity using **PostgreSQL triggers**, improving data consistency across multiple database tables.

Education

National Institute of Technology (NIT), Raipur *2021 – 2025*
B.Tech in Information Technology **CGPA: 8.58 / 10.0**

Projects

Personal Portfolio Website [Live] | [GitHub] *2024*
Front-End Web Application | ReactJS, HTML5, CSS3, JavaScript, Typed.js, AOS

- Designed and developed a fully **responsive** single-page portfolio website using **React.js** functional components and Hooks (**useState, useEffect, useRef**), implementing modular component-based architecture
- Implemented dynamic UI enhancements using **Typed.js** and **AOS** libraries, including animated typing effects and scroll-triggered transitions, improving visual interactivity and overall user engagement.
- Integrated **light/dark theme switching** and a custom preloader using state-driven UI rendering and dynamic CSS class manipulation to enhance perceived performance and overall UI/UX experience.

RailBhasi — Multilingual Railway Announcements App [Play Store] | [GitHub] *2023*
Cross-Platform Mobile Application | React Native, Dialogflow, AI4Bharat (Bhashini), Redux, NLP

- Developed a multilingual conversational railway assistant supporting **20+ Indian languages**, integrating **Dialogflow**-based intent recognition to handle booking, PNR, refund, and station-related queries through **voice and chat interfaces**.
- Implemented an end-to-end **voice processing pipeline** combining **Speech-to-Text**, **Neural Machine Translation**, **Transliteration**, and **Text-to-Speech** to enable real-time multilingual communication and announcements.
- Designed modular railway service features including **Live Station detection**, **Train tracking**, **From-To route search**, and chatbot-based assistance, with state management using **Redux** and interactive UI built with **React Native**.

Achievements

- **Smart India Hackathon (SIH) 2023 — National Finalist** [Certificate] — Selected among **44,000+** competing teams and **50,000+** ideas pan-India; represented NIT Raipur with the RailBhasi multilingual railway accessibility app.
- **Overall Winner — Codeutsava 6.0 National Hackathon** [Certificate] — Secured **1st place** out of all competing teams in the annual flagship hackathon organised by **NIT Raipur**
- Solved **1000+ DSA problems** across multiple coding platforms, demonstrating strong proficiency in problem-solving
- **Lead Organiser — Codeutsava PAN India Hackathon** — Spearheaded the full organisation of **Codeutsava** as **Head of Turing Club of Programmers, NIT Raipur**, managing **20+ volunteers** and **500+ participants**
